

# The 25th Day

## THE AYAT AND THE HADITH OF THE DAY

**Platters and cups of gold will be passed around among them, and they will have there all that their hearts desire and in which their eyes find delight. You will remain in it timelessly, forever.  
(Surat az-Zukhruf, 71)**

**“A space in Paradise equal to the distance between the middle and the end of a bow will be better than all that upon which the sun rises and sets.”  
(Bukhari and Muslim)**

## MIRACLES OF THE QUR'AN

### SUB-ATOMIC PARTICLES

Following the development of the atomic theory of the Greek philosopher Democritus, people used to believe that matter consisted of minute, indivisible and indestructible particles known as atoms. However, advances in the study of atoms have refuted this notion. At the present time, modern science has revealed that the atom, previously regarded as the smallest particle, can actually be split. This fact only emerged in the last century, but was revealed in the Qur'an 1,400 years ago:

**... He is the Knower of the Unseen, Whom not an atom's weight eludes, either in the heavens or in the earth; nor is there anything smaller or larger than that which is not in a Clear Book. (Qur'an, 34:3)**

**... Not even an atom's weight eludes your Lord, either on earth or in heaven. Nor is there anything smaller than that, or larger, which is not in a Clear Book. (Qur'an, 10:61)**

This verse refers to "atom" and smaller particles still.

Up until 20 years ago, it was believed that the smallest particles were the protons and neutrons which comprise the atom. Very recently, however, even smaller particles of which these themselves consist were discovered. A specialised branch of physics, called "particle physics," emerged to study these "sub-particles" and their particular behaviour. Particle physics research has revealed that the protons and neutrons which comprise the atoms actually consist of sub-particles known as quarks. The size of these quarks, the basic components of protons, whose small size is beyond human conception, is astonishing:  $10^{-18}$  (0.000000000000000001 of a metre). (L.M. Ledermann, and D.N. Schramm, "Demonstration: Die Bausteine der Materie," 1989, <http://i115srv.vu-wien.ac.at/physik/ws95/w9560dir/w9561d10.htm>.)

Another point worthy of note is that these verses draw particular attention to the weight of the atom. The word "mithqal," in the expression "mithqali tharratin" (an atom's weight) in the above verses, means weight. In fact, it has been discovered that the protons, neutrons and electrons which form the atom are also compounds which give the atom its weight. Therefore, it is yet another scientific miracle of the Qur'an that attention is drawn instead to the weight of the atom and not its size or any other feature.

1. Ordinary matter consists of atoms bound together by electromagnetic force to form molecules. These molecules come together to form solids, liquids and gasses.
2. Atoms consist of a dense nucleus surrounded by a cloud of electrons. Electromagnetic force holds the nucleus and electrons together.
3. The nucleus consists of protons and neutrons held together by a powerful nuclear force.
4. Protons and neutrons consist of three quarks each and are held together by powerful nuclear force.

### THE RELATIVITY OF TIME

Today, the relativity of time is a proven scientific fact. This was revealed by Einstein's theory of relativity during the early part of the 20<sup>th</sup> century. Until then, it was not known that time was relative, nor that it could change according to the circumstances. Yet, the renowned scientist Albert Einstein proved this fact by discovering the theory of relativity. He showed that time is dependent on mass and velocity.

However, the Qur'an had already included information about time's being relative! Some verses about the subject read:

**... A day with your Lord is equivalent to a thousand years in the way you count. (Qur'an, 22:47)**

**He directs the whole affair from heaven to earth. Then it will again ascend to Him on a Day whose length is a thousand years by the way**

**you measure. (Qur'an, 32:5)**

**The angels and the Spirit ascend to Him in a day whose length is fifty thousand years. (Qur'an, 70:4)**

The fact that the relativity of time is so definitely mentioned in the Qur'an, which began to be revealed in 610, is more evidence that it is a divine book.

## THE END TIMES AND THE EMERGENCE OF THE MAHDI

### SIGNS OF THE MAHDI'S EMERGENCE:

#### The situation before the Mahdi's emergence

• **The people of Sham will take prisoner the tribes of Egypt... (Ibn Hajar al-Haytahami, Al-Qawl al-Mukhtasar fi'alamat al-Mahdi al-Muntazar, p. 49)**

Today, the states in the region in question include Israel. That is why the hadith could be pointing to the war between the State of Israel and Egypt, and the invasion of Egyptian territory.

• **People will compete with one another in constructing high buildings. (Bukhari)**

**Time will pass quickly. (Bukhari)**

**Great distances will be traversed in short spans of time. (Musnad)**

**The Last hour will not come before time contracts, a year being like a month, a month like a week, a week like a day, a day like an hour, and an hour like the kindling of a fire. (Tirmidhi)**

The century we are living in has seen the capability of constructing supersonic aeroplanes, and the ability, thanks to trains and other improvements in means of transport, to make journeys in a few minutes that would once have taken months, and in great comfort. What this hadith indicates is also taking place in this manner.

Communication between continents would take weeks hundreds of years ago, but is now a matter of seconds, thanks to the Internet and improvements in technology. Goods that used to take weeks to arrive, following a long

**British, French and Israelis move on Suez Canal**

On October 26, 1956, Israel attacked Egypt and began to occupy the Sinai Peninsula. The fighting ended shortly afterwards following intervention by the United Nations.

journey, can now be delivered at a moment's notice. Billions of books can now be printed in the time it would take to write a single letter just a few centuries ago. As well, other technological developments have meant that we no longer waste large amounts of time on cooking, cleaning and child minding.

One could go on citing similar examples. Yet, the important thing here, of course, is that the signs of End Times, as set out by the Prophet (saas) in the seventh century, are now happening one by one.

• ***The end of a man's whip will speak to him.(Tirmidhi)***

The whip is known as a tool used in earlier times when riding or guiding pack animals such as horses or camels. When we look closely at this hadith, we can see that the Prophet (saas) is making a comparison. Let us ask people living at the present time a question, 'Is there a modern implement that talks and resembles a whip?'

The most logical reply to that question is the mobile telephone, with its long antenna, or similar communications equipment. If we bear in mind that mobile or satellite phones are comparatively recent developments, then the wisdom behind the Prophet (saas)'s description of 1,400 years ago is even clearer. That is just one more indication that we are living through the End Times.

## THE EVOLUTION DECEIT

### THE THEORY OF EVOLUTION IS THE MOST POTENT SPELL IN THE WORLD

The theory of evolution lacks any scientific evidence and that on the contrary, scientific proofs from such branches of science such as paleontology, microbiology and anatomy reveal it to be a bankrupt theory. Evolution is incompatible with scientific discoveries, reason and logic.

It needs to be made clear that anyone free of prejudice and the influence of any particular ideology, who uses only his reason and logic, will clearly understand that belief in the theory of evolution, which brings to mind the superstitions of societies with no knowledge of science or civilization, is quite impossible.

Those who believe in the theory of evolution think that a few atoms and molecules thrown into a huge vat could produce thinking, reasoning professors, university students, scientists such as Einstein and Galileo, artists such as Humphrey Bogart, Frank Sinatra and Pavarotti, as well as antelopes, lemon trees and carnations. Moreover, the scientists and professors who believe in this nonsense are educated people. That is why it is quite justifiable to speak of the theory of evolution as "the most potent spell in history." Never before has any other belief or idea so taken away peoples' powers of reason, refused to allow them to think intelligently and logically and hidden the truth from them as if they had been blindfolded. This is an even worse and unbelievable blindness than the Egyptians worshipping the Sun God Ra, totem worship in some parts of Africa, the people of Saba worshipping the Sun, the tribe of the Prophet Abraham worshipping idols they had made with their own hands or the people of the Prophet Musa (pbuh) worshipping the Golden Calf. In fact, this situation is a lack of reason pointed to by Allah in the Qur'an. He reveals in many verses that some peoples' minds will be closed and that they will be powerless to see the truth. Some of these verses are as follows:

**As for those who disbelieve, it makes no difference to them whether you warn them or do not warn them, they will not believe. Allah has sealed up their hearts and hearing and over their eyes is a blindfold. They will have a terrible punishment. (Surat al-Baqara: 6-7)**

**...They have hearts they do not understand with. They have eyes they do not see with. They have ears they do not hear with. Such people are like cattle. No, they are even further astray! They are the unaware. (Surat al-A'raf: 179)**

Words cannot express just how astonishing it is that this spell should hold such a wide community in thrall, keep people from the truth, and not be broken for 150 years. It is understandable that one or a few people might believe in impossible scenarios and claims full of stupidity and illogicality.

However, "magic" is the only possible explanation for people from all over the world believing that unconscious and lifeless atoms suddenly decided to come together and form a universe that functions with a flawless system of organization, discipline, reason and consciousness, the planet Earth with all its features so perfectly suited to life, and living things full of countless complex systems.

In fact, Allah reveals in the Qur'an in the incident of the Prophet Musa (pbuh) and Pharaoh that some people who support atheistic philosophies actually influence others by magic. When Pharaoh was told about the true religion, he told the Prophet Musa (pbuh) to meet with his own magicians. When the Prophet Musa (pbuh) did so, he told them to demonstrate their abilities first. The verses continue:

**He said, "You throw." And when they threw, they cast a spell on the people's eyes and caused them to feel great fear of them. They produced an extremely powerful magic. (Surat al-A'raf: 116)**

As we have seen, Pharaoh's magicians were able to deceive everyone, apart from the Prophet Musa (pbuh) and those who believed in him. However, the evidence put forward by the Prophet Musa (pbuh) broke that spell, or "swallowed up what they had forged" as the verse puts it.

**We revealed to Musa, "Throw down your staff." And it immediately swallowed up what they had forged. So the Truth took place and what they did was shown to be false. (Surat al-A'raf: 117-119)**

As we can see from that verse, when it was realized that what these people who had first cast a spell over others had done was just an illusion, they lost all credibility. In the present day too, unless those who under the influence of a similar spell believe in these ridiculous claims under their scientific disguise and spend their lives defending them abandon them, they too will be humiliated when the full truth emerges and the spell is broken. In fact, Malcolm Muggeridge, a philosopher admitted he was worried by just that prospect:

I myself am convinced that the theory of evolution, especially the extent to which it's been applied, will be one of the great jokes in the history books in the future. Posterity will marvel that so very flimsy and dubious an hypothesis could be accepted with the incredible credulity that it has. (*Loren C. Eiseley, The Immense Journey, Vintage Books, 1958, p. 186*)

That future is not far off: On the contrary, people will soon see that "chance" is not a god, and will look back on the theory of evolution as the worst deceit and the most terrible spell in the world. That spell is already rapidly beginning to be lifted from the shoulders of people all over the world. Many people who see the true face of the theory of evolution are wondering with amazement how it was that they were ever taken in by it.

## THE MUSLIM WAY OF SPEAKING

### SAYING "IT IS ALLAH WILLS, THERE IS NO STRENGTH BUT IN ALLAH"

The true possessor of all the blessings which a person witnesses in the life of this world is Allah. However, there are some who may fall into error by believing that they are the real owners of the blessings which Allah has granted them. With these blessings in their possession, they may forget their powerlessness in the sight of our Lord, and become arrogant though Allah has the power to take back everything He has given them whenever He wills. Because of this, it is necessary for all to recognize that every blessing is the gift of Allah, and to thank our Lord for our enjoyment of them. In order for people to understand this matter, Allah gives the following example in the Qur'an:

**Make an example for them of two men. To one of them We gave two gardens of grape-vines and surrounded them with date-palms, putting between them some cultivated land. Both gardens yielded their crops and did not suffer any loss, and We made a river flow right through the middle of them. He was a man of wealth and property and he said to his companion, debating with him, "I have more wealth than you and more people under me." He entered his garden and wronged himself by saying, "I do not think that this will ever end. I do not think the Hour will ever come. But if I should be sent back to my Lord, I will definitely get something better in return." (Surat al-Kahf: 32-36)**

Of the two people referred to here in the Qur'an, the one who was more powerful in terms of wealth forgot that it was Allah Who gave him his property and riches, falsely believing that they were his own and becoming boastful. He believed that the gardens, which yielded their crops because Allah made them fertile, would never be destroyed or suffer any damage at all. In one way, it could be thought that his well protected orchard, through which a river passed and which had every promise of fertility, was of a beauty and magnificence which could never be harmed. But, it must be remembered that all things are subservient to Allah. Like everything in the universe, this garden was under Allah's control; every seed would grow only with Allah's permission, every branch sprouted because Allah ordered it. The river watered the roots of the date palms because Allah willed it. The garden remained thriving and fruitful on Allah's instruction; all could be destroyed just by Allah pronouncing "Be."

In the Qur'an we are told that the man, who had forgotten that the provider of the blessings he possessed was Allah, was reminded that he should praise and exalt Allah's power and glory, on entering his orchard, and say, "It is as Allah wills [masha'llah], there is no strength but in Allah":

**His companion, with whom he was debating, said to him, "Do you then disbelieve in Him Who created you from dust, then from a drop of sperm, and then formed you as a man? He is, however, Allah, my Lord, and I will not associate anyone with my Lord. Why, when you entered your garden, did you not say, 'It is as Allah wills, there is no strength but in Allah?' Though you see me with less wealth and children than you possess, it may well be that my Lord will give me something better than your garden and send down on it a fireball from the sky so that morning finds it a shifting heap of dust, or morning finds its water drained into the earth so that you cannot get at it." The fruits of his labor were completely destroyed and he woke up wringing his hands in grief, rueing everything that he had spent on it. It was a ruin with all its trellises fallen in. He said, "Oh, if only I had not associated anyone with my Lord!" There was no group to come to his aid, besides Allah, and he was not given any help. In that situation the only protection is from Allah, the Real. He gives the best reward and the best outcome. (Surat al-Kahf: 37-44)**

As can be understood from these verses, by bringing about a natural disaster, Allah destroyed both the garden and the crops of this man, who was so proud of what was in his possession, to remind him that there is no other power than His. The owner of the garden, who had had everything he possessed destroyed, finally understood that he had no friend or helper other than Allah, and took refuge in Allah saying, "if only I had not associated anyone with my Lord!"

One of the lessons which needs to be drawn from this story provided in the Qur'an is that people should never at any time believe that their possessions are their own, and that they should speak in such a way as to exalt the glory of Allah, as saying, "It is as Allah wills, there is no strength but in Allah."

## NAMES OF ALLAH

### AL-FALIQ THE OPENER, THE SPLITTER

Allah splits the seed and kernel. He brings forth the living from the dead, and produces the dead out of the living. That is Allah, so how are you deluded? He splits the sky at dawn, and appoints the night as a time of stillness and the Sun and Moon as a means of reckoning. That is what the Almighty, the All-Knowing has ordained. (Surat al-An'am, 95-96)

Our planet contains many kinds of plants, each of which has seeds unique to itself. If you keep dry seeds in a room, they may remain unchanged for years. Yet once they are buried in the ground or another suitable place, they start to sprout and, one day, grow into a rose bush or a giant plane tree.

While it is amazing to see such variety coming from a "dry seed," even more amazing is the formation of a living being.

For a tree to exist, its seed has to collect the necessary materials from the soil and begin to grow. But a seed cannot determine the amount of minerals and water it needs, nor can it decide to grow into a green plant or a fruit tree.

If we claim that a seed can make such decisions, then we have to accept that the seed is "talented." But we cannot seriously assert that any seed has such faculties. As the verses above inform us, only Allah "splits the seed and kernel." By His will, countless trees and plants come into existence. Indeed, another verse relates that Allah creates everything:

**He sends down water from the sky, from which We bring forth growth of every kind, and from that We bring forth the green shoots, and from them We bring forth close-packed seeds, and from the spathes of the date palm date clusters hanging down, and gardens of grapes and olives and pomegranates, both similar and dissimilar. Look at their fruits as they bear fruit and ripen. There are Signs in that for people who believe. (Surat al-An'am, 99)**

(For further reference, please see, [Names of Allah](#), by Harun Yahya)

## QUICK GRASP OF FAITH

### IS IT PROPER TO ARGUE WHEN ONE'S KNOWLEDGE OF AN ISSUE IS INCOMPLETE?

Allah advises people not to argue about issues of which they have no knowledge, because over everyone with knowledge is someone who knows better. People do not derive any benefit from arguing over things about which they are not knowledgeable. The best behavior in such a case is to consult those who are more knowledgeable in order to learn the correct information. The Qur'an reminds people not to pursue things of which they have no knowledge, as follows:

**Do not pursue what you have no knowledge of. Hearing, sight and hearts will all be questioned. (Surat al-Isra':36)**

\* What about people who warn others, yet do not personally practice what they recommend?

The Qur'an advises the believers to enjoin one another to do right and to forbid wrong. This surely pleases Allah. However, the really important thing is to do what they ask others to do, thereby setting an example in their own behavior and good morals. If somebody knows that a particular action is wrong and is disturbed to see someone else doing it, then he or she is equally responsible for abandoning this act and performing the right action. Allah reminds the believers of this, as follows:

**Do you order people to devoutness and forget yourselves, when you recite the Book? Will you not use your intellect? (Surat al-Baqara, 44)**

(For further reference, please see, Quick Grasp of Faith [1](#), [2](#), [3](#) by Harun Yahya)

## BOOK REVIEW

### THE RISE OF ISLAM

B y H a r u n Y a h y a

If we put all the news we hear from the media about peoples' turning to Islam together we can grasp the extraordinary course of events.

The purpose of this book is to present all these developments collectively, to analyze them and thus help readers to appreciate the due importance of these events.

By doing this, the book aims to increase believers' zeal and enthusiasm.

## **EVOLUTION DECEIT**

The greatest fraud in the history of science is unveiled...

Many people think that Darwin's Theory of Evolution is a proven fact. Contrary to this conventional wisdom, recent developments in science completely disprove the theory. The only reason Darwinism is still foisted on people by means of a worldwide propaganda campaign lies in the ideological aspects of the theory. All secular ideologies and philosophies try to provide a basis for themselves by relying on the theory of evolution.

This web site clarifies the scientific collapse of the theory of evolution in a way that is detailed but easy to understand. It reveals the frauds and distortions committed by evolutionists to "prove" evolution. Finally it analyzes the powers and motives that strive to keep this theory alive and make people believe in it. Anyone who wants to learn about the origin of living things, including mankind, needs to read this web site.
