

# The Theoretician of the Big Bang Has Declared His Belief in God

Declaring his belief in God Dr. Brian Cox, one of the scientists who espoused the idea that the universe came into existence as the result of a Big Bang, said "I respect people who have strong religious beliefs.."\*

Fourteen centuries ago the Qur'an also revealed that the entire universe had emerged by expanding from its original very small mass, just as revealed by the Big Bang:

**Do those who do not believe not see that the heavens and the earth were sewn together and then We unstitched them and that We made from water every living thing? So will they not believe? (Surat al-Anbiya, 30)**

Today's modern scientific discoveries confirm the reality revealed by the verses of the Qur'an. The universe came into being through God's creation not, as materialists believe, through a series of coincidences, and the information we receive from God about the origin of the universe is without doubt the most accurate of all.
