

Facts about the Human Body of Which Darwinists Are Unaware

The supplement to the 31 August, 2007, edition of the Turkish magazine *Cumhuriyet Bilim ve Teknik* carried a report titled "The Human Body Is Filled with Evolution's Worst Mistakes." One of the worst errors in the report, written on the basis of the preconception that human beings evolved from primates, was the claim that humans were subjected to various flaws during the supposed process of evolution.

The supplement to the 31 August, 2007, edition of the Turkish magazine *Cumhuriyet Bilim ve Teknik* carried a report titled "The Human Body Is Filled with Evolution's Worst Mistakes." One of the worst errors in the report, written on the basis of the preconception that human beings evolved from primates, was the claim that humans were subjected to various flaws during the supposed process of evolution. According to Darwinists, the fictitious evolutionary process left various flaws in the human body and these supposedly left other life forms in a superior position.

The important matter so evident in the article and that requires urgent correction is this: the subject of human evolution exists solely in Darwinists' imaginations; it is a claim based solely upon speculation, one that is literally groundless and devoid of any scientific evidence whatsoever. Contrary to evolutionist expectations, the fossil record constantly refutes the scenario of human evolution and reveals that living things came into being instantaneously. Darwinists seek to maintain this claim by means of hollow propaganda techniques. As with all evolutionist texts, this report also contained an attempt to impose the myth of human evolution, and on the basis of that claim it engaged in utterly unfounded interpretations, such as the phenomena this imaginary evolution is supposed to give rise to. Because of the propaganda technique employed, and despite no evidence being submitted, any reader with a less than comprehensive knowledge of the subject may have formed the mistaken impression that evolution actually happened and left behind it flaws in the human body. That is not, in fact, the case at all. Evolution never took place in any form during the course of natural history. Neither human beings nor any other living things evolved. The idea has been definitively and scientifically disproved, while it has been scientifically demonstrated that living things emerged in a single moment, together with all their perfect structures, in other words, that they were created out of nothing. (For more detail click [HERE](#))

Human Physical Deficiencies Are Evidence of Creation

The reason for the second major gaffe in CBT magazine is the way evolutionists construct further analysis based on the scenario of human evolution. The report in question carried evolutionist interpretations, based on these preconceptions, concerning the way that human beings have weaker attributes than those of other living things.

But there is one fact of which Darwinists are unaware regarding this claim that is raised from time to time: Allah (God) tells us in one verse that: "Allah desires to make things lighter for you. Man was created weak." (Surat an-Nisa', 28)

According to this fact, revealed in the Qur'an by Almighty Allah, human beings are entities created to be weak. Indeed, human beings lack many of the superior characteristics possessed by other living things. An eagle, for example, has more acute vision than human do, greyhounds can run faster, and cockroaches can survive in far more difficult conditions. Animals are impervious to many diseases that affect human beings. The great majority of living things are better able to withstand extreme environments than we are. Insects' thick shells protect them from all the hazards of the outside world. But things are very different for human beings. The reason for this is that Allah has created the human body to be "weak."

There is great wisdom in the way that Allah has created human beings to be weak. Man is an entity subjected to testing in this world and who will be called to account for his deeds in the hereafter. Our Lord has created man with and given him weaknesses so that he should understand his helplessness before Allah and should not become proud or regard himself as superior to Allah himself. However, it needs to be made clear that Allah, our Lord, Who creates all entities from nothing and Who equips them with flawless systems, Who gives the eagle its sharp sight and the cockroach the ability to withstand radiation, is sufficiently powerful to create all beings, man included, in a perfect and immaculate manner. The weaknesses inherent in human beings are not "evolutionary flaws," as evolutionists maintain, but a secret specially created by Allah. Human beings have weaknesses because Allah so desires. Flawless creation will take place in man's true home in the Hereafter, in Paradise. Human beings are helpless in this world

because Allah wishes them to desire the hereafter, in which a perfect creation prevails. That is the great truth of which Darwinists are unaware.

So long as Darwinists fail to understand that all entities are the work of Allah they will constantly repeat the logical errors apparent in the article in question. They will be unable to understand that Allah creates both flaws and perfection. They will be unable to see that there is wisdom and a purpose behind every weakness. They must avoid constructing imaginary evolutionary scenarios for human beings and other forms of life, despite the total lack of evidence for evolution, and they must cease ascribing the wise proofs of creation by Allah to this false evolutionary process. The fact is that it is Allah Who creates this world, the Earth, the sky and everything in them, Who knows their every state, and is powerful enough to make perfect creation.

The Tale of Vestigial Organs Is a Lie, as the World of Science Has Agreed

Another claim which CBT refuses to abandon is that organs such as the appendix have survived down to the present day by becoming vestigial during the course of the process of evolution and that they serve no function in the human body. First and foremost it needs to be made clear that these organs that Darwinists declare to be vestigial actually do have a function, and that is a fact admitted in the scientific literature. Previous articles have already explained in great details why evolutionists are in error on this subject. You can read detailed accounts of the invalidity of the idea of vestigial organs and the true functions of the organs involved [HERE](#).

Conclusion

Because the fanatical supporters of Darwinism are so blindly devoted to their theory they are largely unaware of the true facts. They are unable to see that the way certain human characteristics are weaker than those of other living things is actually a miracle and that, as shown in many flawlessly created structures and organs, Allah is capable of perfect and flawless creation whenever He so wishes. Evolutionists' empty logic makes their claims laughable and unfounded. We call upon Cumhuriyet Teknik ve Bilim magazine to abandon its groundless efforts to support Darwinism. The theory of evolution is in a state of crisis and collapse. Attempting to keep the theory alive by means of groundless claims and endeavours will serve no purpose at all.

This article also serves as our response to an article titled "Evolution's Greatest Mistakes" which was published in *New Scientist* magazine on 11 August, 2007.
