## Protect children, who are paying the highest price for wars

There is no doubt that children are the highest price for wars. They are the most vulnerable and the most innocent. Wars cause them to lose their homes, their families, and their lives. This is a tragedy that we must not ignore. We must do everything we can to protect children from the horrors of war. This is our moral obligation as a society.

## Trump is a distillation of Republican pathologies

Another fact that we should also know is that Trump is a distillation of Republican pathologies. He represents the worst of the party's values and beliefs. His policies and actions are a reflection of the party's deep-seated prejudices and biases. This is a tragedy for the country, as it shows that the Republican Party has lost touch with reality. We must do everything we can to hold them accountable for their actions.
